

St White's Primary School - Computing

Phase: KS1

Topic: E - Safety

What should I already know?

We use technology to help us in our everyday lives. Computers, tablets and phone use the internet.
The internet provides us with information and lets us share our information.

Knowledge

When we use a computer online we are able to share our information. Its important that we know about who we should share information with and what we should share so that we stay safe. If something happens when you are using the computer online, that makes you feel uncomfortable, you need to tell a trusted adult about it. There are people that we can trust and people that we shouldn't trust. It's important that your grown up knows when you are online and what you are looking at so that you stay safe.

Values

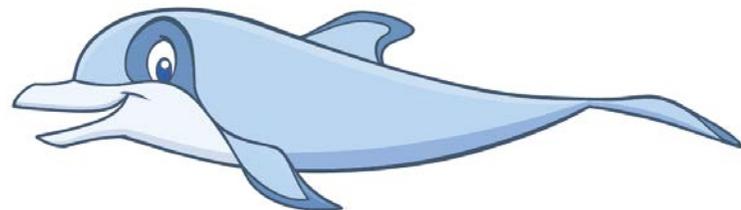

Challenge	What challenges might we face when we use a device to go online?
Commit	What should you commit to do before you go online?
Conquer	Why is important to help others learn to conquer online dangers.
Celebrate	How do people help to celebrate someone's birthday online?

Key facts and figures

You have to be **13** before you are allowed to have a Facebook or other social media account.
There are special social media accounts that are specially designed for children
