

What will I know by the end of the unit?

I will be able to spot flowers when I am out and about.

I will know the names of some local wild flowers.

I will be able to care for a plant by watering it and putting it in the sunlight.

I know that petals change and start to look different when they have fallen off the plant. I will be able to talk about these changes and how it starts to look different.

I will know that it is my job to look after our school grounds by keeping it tidy and looking after the wildlife.

forget me not

Values

Challenge	Can we grow a sunflower?
Commit	How do we look after a plant?
Conquer	What will our sunflower look like? How tall will it grow?
Celebrate	We can enjoy looking at our lovely flowers!

bluebell

daisy

sunflower

buttercup

clover

dandelion
