

Senses

sight

hearing

touch

taste

smell

What knowledge do I already have?

I can name some animals.
I know that different animals eat different foods.
I can name my 5 senses.

What will I know by the end of the unit?

There are different names for different groups of animals: mammals, fish, birds, amphibians and reptiles.

Animals share characteristics with other animals in their group.

Animals can be grouped into carnivore, omnivore or herbivore.

We have 5 senses: sight, hearing, touch, taste and smell.

Different parts of my body are used for each of the senses

Each part of my body has a name; I can name these parts, point to them on my body and label them on a picture.

Technical vocabulary

amphibians

Amphibians live in the water as babies and on land as they grow older. They have smooth, slimy skin.

birds

All birds have a beak, two legs, feathers and wings.

fish

Fish live and breathe under water. They have scaly skin, fins to help them swim and they breathe through gills.

mammals

Mammals are animals that breathe air, grow hair or fur and feed on their mother's milk as a baby.

reptiles

All reptiles breathe air. They have scales on their skin.

carnivore

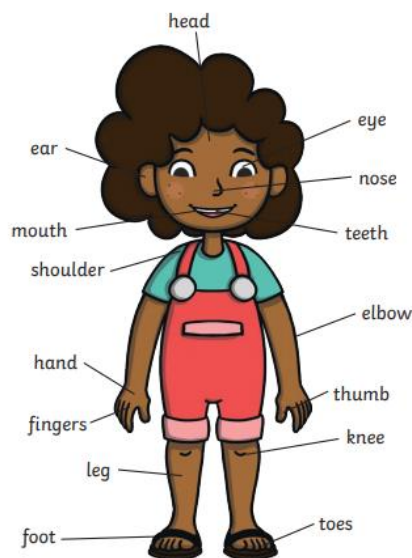

Animals that mostly eat other animals (meat) are carnivores.

herbivore

Animals that only eat plants are herbivores.

omnivore

Animals that eat both plants and other animals are omnivores.
